DETAILED ACTION

Response to Amendment

Applicant submitted an amendment dated December 14, 2005, wherein claims 1-15 are pending. Claims 7-9 and 13-15 have been withdrawn from consideration.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1 and 4 are rejected under 35 U.S.C. 102(e) as being anticipated by anticipated by Motzigkeit'976 (US Patent No.6, 743,976).

Regarding claim 1, Motzigkeit discloses power cables laid out along an underside of a floor of an electric vehicle (see figure 2), and metallic protection pipes for passing the power cables individually there through (see figure 6, element 141 and 10), wherein the metallic protection pipes are then retained on the underside of the floor of the vehicle (see figure 2, element 1).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3618

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Motzigkeit'976 (US Patent No.6, 743,976).

Regarding claim 4, (although the prior art fails to state that the protection pipe is formed by being bent after the power cable is passed there through, examiner takes official notice that it would have been obvious to one of ordinary skill in the art at the time of the invention was made to pass cable through protection piping, that the cable is bent afterwards).

Response to Arguments

Applicant's arguments with respect to claim 1 and 4 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's arguments, see page 5, filed December 14, 2005, with respect to claims 2 and 10 have been fully considered and are persuasive. The objection of 9/15/2005 has been withdrawn.

Applicant's arguments, see page 6, filed December 14, 2005, with respect to the rejoinder of 13-15 have been fully considered and are persuasive. The objection of 9/15/2005 has been withdrawn. Applicant arguments on Rejoinder of claims 7-9 **are not** persuasive and will remain under non-elected species status.

Allowable Subject Matter

Claims 2,10 and 13-15 allowed.
